

## **INSTALLATION GUIDE FOR DARK CITY**

Installing *Dark City* is easy, if you have a Mac or a Windows PC. Currently, the game is not playable on Android or iOS devices.

### **FOR PC:**

1. Once you click to download the game, you will find a .zip file in your downloads. Right click the file and select "Extract All" to unzip the file.
2. After unzipping, you will see a file called [EPISODE NAME] with a character icon next to it. Simply double click this to play the game!
3. Do not remove the episode from the folder! You may, however, make a shortcut on your desktop.

### **FOR MAC:**

Installing and playing Itch.io games for Mac requires a few more steps, so please read this guide carefully!

1. Once you download the .zip file, locate it in your Finder (usually under downloads), and double-click it to expand the file.
2. You will see a file titled [EPISODE FILE NAME] with a character icon next to it.
3. Upon clicking the icon, you will get a notification that it cannot be opened due to being from an unidentified developer.
4. After receiving the notification, head to your "System Preferences" under the Apple icon in the top left corner of your screen and select "Security and Privacy".
5. There, you should see a notification saying "[EPISODE FILE NAME] was blocked from use because it is not from an identified developer." Next to it is a button saying, "Open Anyway". Click the button.
6. You may need to unlock your security preferences to click the button, using the padlock icon in the bottom left corner.
7. Once you click "Open Anyway", you will get a second pop-up notification, letting you know the app is from an unidentified developer. This time, there will be an option to open it. Click "open"
8. Once you open the app, you will be able to open it easily any time from here on out, without having to go through these steps.
